Just not at my desk. Monday is fine unless you want to chat now.

I thought I remembered you sending out an email after the meeting with Bob P, but I didn't find it in my in box. I'm guessing you're out today, since your message came from your iPhone, but I can call you on Monday if you'll be in.

That's right. Bob basically asked, " you are talking to Jared, right?"

Yes, let us know how it goes. I am free to chat prior if you like.

FYI. When Westlands met with Bob P and Lisa Feldt recently, apparently Lisa suggested they follow up with Jared. They wanted to do this before the BDCP comment deadline, and since Jared will be in DC most of next week, we offered Kathleen J and me to listen to them. I know Tim is on leave. I don't think we need to involve anyone else in the meeting (let me know if you feel otherwise). I'll let you know what transpires.

Thank you Catherine for your note. From speaking with Jane and Kathleen Johnson, the Director of the Enforcement Division where Kathleen's office is housed, they are both free to meet with your group this Tuesday, July 22 in our SF office from 10-11am. Unfortunately both Jared and Alexis are not free at this time, and this is the only time that both our Water and NEPA Directors are available. They will make sure to touch base with Jared after your meeting. Can you please provide a list with the names, titles, and agency of the individuals who will attend person by COB this Friday so we can send such to our building security? Thank you and have a great weekend!

Hi Trina,

Thank you for your time today (and I understand about technology mishaps) and for agreeing to help put me in touch with the right folks that we can coordinate with in Jane Diamond and Kathleen Goforth's shop so that we can potentially have a good in person meeting on Tuesday July 22. Your efforts to have either the RA or the DRA on the telephone while they are out here in DC with potentially one of us here in the room are very much appreciated.

My contact information is all below.

Thank you,

Catherine
